

Family Planning and Reproductive Health

June 2014

The Family Planning Program provides federal Title X and state funding for comprehensive family planning services in 33 of the state's 39 counties through contracts with local health jurisdictions (LHJs) and local non-profit agencies. Family planning works to develop and sustain support for family planning providers, enhance local capacity to provide effective service delivery, and collaborate with other programs to integrate and expand family planning and reproductive health services.

Mission/Purpose: Create affordable access to family planning and reproductive health services to reduce the health and social impacts of teen and unintended pregnancies, late detection of reproductive cancers, and the transmission of sexually transmitted infections.

Target Population: Priority clients are low-income women and men – including adolescents – in need of subsidized family planning and reproductive health services. In calendar year 2013, family planning contractors served about 92,000 persons. Approximately 66 percent had incomes at or below 100 percent of the federal poverty level.

Services

- Administer Title X grant, assuring state and federal compliance
- Provide reproductive health and contraceptive services through local agencies targeting populations that would otherwise have difficulty accessing these services
- Reduce teen and unintended pregnancies
- Reduce transmission of sexually transmitted disease, including HIV
- Promote early detection of reproductive cancers through cancer screening
- Provide preconception care, and referral to primary and prenatal care
- Provide a clearinghouse for family planning information, training, consultation, and technical assistance
- Provide information and referrals for primary care and other services
- Maintain regional data system for client visits

Stakeholders

- National Family Planning and Reproductive Health Association
- Providers: local health jurisdictions (LHJs) and private non-profit
- Health Care Authority/Medicaid
- Washington State Department of Health's Safety Net
- Washington State Council on Family Planning
- Planned Parenthood Votes Northwest
- Cardea (Title X national training center)

2013-15 Biennium

Family Planning and Reproductive Health Fiscal Information

	GF-S	Federal	Dedicated	Fees	Total	Sal & Ben	Pass-Thru	Other
Total	17,974,401	7,460,671	0	0	25,435,072	1,457,460	23,739,443	238,169

Recent Funding History

2007-09 biennium:

- Beginning in FY09, On-going GF-S funding of \$5 million was provided for family planning clinics to backfill lost federal funds as a result of changes to the federal Take Charge Family Planning Medicaid Waiver.

2009-11 biennium:

- Initial biennium budget included an ongoing GF-S reduction of \$500,000 for FY10 and \$3.5 million for FY11.
- The 2010 supplemental budget included an ongoing GF-S funding of \$3 million to restore some of the initial biennium budget reduction for FY11. This with the prior item results in a \$500,000 per year ongoing GF-S reduction.
- The 2011 supplemental budget included a one-time \$140,000 GF-S reduction for FY11.

2011-13 biennium:

- On-going GF-S reduction of \$2.25 million for Family planning services.
- Federal funding has decreased by \$700,000 due to changes in funding for special projects and sequestration.
